Interface Portions and In-line Portions of the Various Units and Devices

GT7 Series

<GT7, GT7A, and GT7W>

Features

- These automotive crimp terminals are equivalent to 040 and 070 tab width items.
- The contact portion of the F connector side has been given a double structure to make these connectors compatible with low insertion force and high contact pressure at the time of coupling.
- In this design, the contact portion is housed in a box that is formed by a press. This prevents the contact portion from being misshapen by an external force.
- The design of the waterproof connectors uses a 2-stage sequence having a low insertion force.

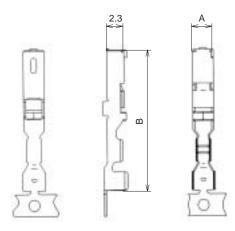

^{*} A partial gold plating specification can be applied to only the terminals specified by the customer.

F Connectors

Terminals

GT 13

Part Number	CL No.	Material	Finish	Outer Diameter	A dimension	B dimension	Packaging
GT7-2022SCF	757-0001-1	Connor		1.4 to 2.4	2.0	10	5,000 pcs. per reel
GT7A-2022SCF	757-0003-7	Copper alloy	Tin plating	2.6 to 3.1	2.8	19	3,000 pcs. per reel
GT3-2024SCF	753-0006-0	anoy		1.4 to 2.4	2.3	15.7	5,000 pcs. per reel

Note 1: Sold by the reel.

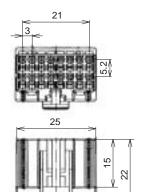

Note 2: This component is used only with applicable HRS housings.

Termination Tools

User's manuals are available. Please ask your Hirose Electric account representative.

Automatic Crimping Machine

Part number CM-105

Item	Specification	Remarks
Specification	1.5ton	
Stroke Length	30mm	
Number of strokes	200spm(50 Hz)	240spm(60 Hz)
Weight	75 kg	
Motor	0.2kw	AC100V
Crimping speed	2,000 to 4,000 pcs. per hour	

Hand Tool

Crimp height setting tables are available for each cable type. Please contact your nearest Hirose Electric account representative. Different cables will require different crimp height settings.
